 CUSTOM DATABASE PROGRAMMING FOR THE INTERNET

## YOUR INTERNET SOLUTION SPECIALIST

### LET eBlast POWER YOUR NEXT EMAIL MARKETING PROGRAM

Your next email marketing program can be one that is both cost effective and results driven. Our product, GWD eBlast can be branded according to your corporate identity. eBlast is your complete turnkey email marketing solution. You enter your services, products, or information into the passworded administrative interface and press send. eBlast will look after the rest. It keeps track of your mailing list, allows customers to subscribe and unsubscribe without any interaction from you. There are no ongoing fees\* for sending weekly or monthly newsletters.

### UPDATE YOUR WEBSITE WITH THE NEW GWD SUITE

At GWD we have listened to our clients, and developed a suite that runs on the webserver and tightly integrates with your website. The GWD Suite is a collection of four features, that companies have requested, to update portions of their website. This suite is easy to manage with the passworded administrative console and is effective in keeping your site dynamic. Give your customers and prospective customers reason to come back to your site, by giving new information on a regular basis without bothering or paying your webmaster.

### HOST YOUR SITE WITH US

We have many hosting solutions and we gear them to your individual company needs. Our secure, reliable servers are located in a class 1 NOC. We will customize a plan just for you. Our Linux servers are full featured units that can accommodate from the smallest to the largest site.

We offer many extras as standard features. They include: php / MySQL database, server antivirus scanning, anti-spam, easily accessible tech support, your own cgi-bin directory, pop and imap email, statistics package, your own control panel, fast reliable servers, anonymous FTP and 24 hour monitoring.

\* If your site is hosted on a GWD server.

## CUSTOM PROGRAMMING FOR YOUR DYNAMIC SITE

We pride ourselves in exceeding customer expectations in both aesthetics and functionality for a fair price. With our custom programming, you get exactly what you want . . . You no longer have to accept deficiencies in commercially available programs. We discuss your needs and expectations with you. Once we have an approved specification, our programmer will program according to that specification for a superbly planned end product, no matter what the complexity is. We can also integrate shopping carts. See some of the work that we have done below.

jetways.ca

This site has a complete online shuttle booking system, including boarding passes and manifests with online credit card payment / approval integration

fairwaysgolf.ca

The customer can edit every part of this website, including the navigation. It is managed from the administrator console. It also has CP news feed integration

greatlakestour.com

The programming used in this professional golf tour site, calculates and keeps track of all statistics for all players, winnings and biographies

chamberstoneycreek.com

The Chamber members can search for member services, names and addresses, using the searchable member database.

## PROJECT BASED INFORMATION SHARING

extraNET was designed to provide a method for groups, working on a project, to have a way to share information or files, in an organized way, over the internet. This program is especially useful for engineering firms, construction companies, graphics offices or multi-location offices. Once information is uploaded to a project, the software emails a notification, to all people that are associated with that project. It keeps track of who has logged in, to get the information, referenced in the email. This ensures that all members of the group have seen the shared item. It can be used to share drawings, Word, Excel, pdf, or any other type of file. extraNET will be branded according to your corporate identity.
